

Go Green While Preserving Your Bottom Line

Green energy has historically been expensive but due to rapidly declining prices - and leveraging it's negotiating power - the Smart Energy Co-Op of Maryland (SECO-MD) can now offer 100% green electricity to Maryland businesses at the same cost as "brown" power.

SECO-MD is the first in the Country to offer this and there is now simply no reason not to "Go Green" and earn SECO-MD's 100% green certification.

The Maryland Excellence In Energy Challenge

SECO-MD is highlighting the communities across Maryland that go green by tracking each community's transition to green energy. This is a great way of recognizing each community's individual commitment to economic competitiveness and sustainability while also showing how in aggregate Maryland can distinguish itself Nationally.

Here's what SECO-MD provides:

- A 100% cost guarantee that the green electricity adds zero cost
- Turn-key management of the painless process of converting
- "Certification" that the electricity is truly green
- A window decal that highlights your exclusive use of green electricity
- On-going monitoring of electricity prices to ensure you're receiving the cheapest, greenest energy available
- Maintenance of the Excellence In Energy website which tracks your community and the State's transition to green energy
