

# Everything For Your Business's Roof, Under One Roof

Solar PV on the roof of your business can be an excellent way of lowering costs, improving your sustainability and creating long-term energy price stability. The Smart Energy Co-Op makes adopting solar PV simple, affordable and low-risk.

What the Co-Op will deliver:

- Free utility bill review
- Free preliminary PV system sizing
- Projected economic & environmental benefits
- Summary of zero-down financing options and available rates
- RFP generation and submittal to up to 3 qualified, vetted PV contractors
- Contract, equipment, warranties and workmanship warranty reviews
- "Volume-based" PV equipment and installation discounts
- Discounted offers on complementary battery storage and/or generators
- System registration for Solar Renewable Energy Credits (SREC) generation
- Contractor management
