

Everything For Your Home's Roof, Under One Roof

Solar PV on the roof of your home can be an excellent way of lowering costs, improving your sustainability and creating long-term energy price stability. The Smart Energy Co-Op makes adopting solar PV simple, affordable and low-risk.

What the Smart Energy Co-Op (SECO) will deliver:

- Zero-down, 15-year solar loan @ 3.99% APR
- Monthly electricity savings 100% off-sets loan payments
- Cost premium for self-generated energy = \$0
- No annual escalation in payments
- All federal & state incentives go directly to home owner
- No control of your roof by a monopolistic leasing company
- No prepayment penalties
- Discounted offers on complementary battery storage and/or generators
- Turn-key installation by vetted, best-in-class contractors
- Best-in-class PV equipment and warranties
- Best of all, SECO makes the first year's payments for the home owner
