

Toughen Up & Power-Through Grid Outages

Power outages can have a costly impact on your home and business. Battery storage coupled with a small generator can help you power-through grid interruptions, save money via lower demand charges, earn revenues by providing grid services and sometimes even lower insurance costs.

What the Smart Energy Co-Op (SECO) will deliver:

- Free energy resiliency assessment
- SECO negotiated discounts on battery storage and generators
- Zero-down financing
- Contract, equipment, warranties and workmanship warranty reviews
- Turn-key installation management
- Increased resiliency & peace of mind
- Potentially lower insurance premiums
- Low risk; No brain damage
- No reduction in borrowing capacity
- Registration of system for grid services revenues
